5N PLUS INC.  
NOTES TO UNAUDITED INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
September 30, 2014 and 2013  

(Figures in thousands of United States dollars, unless otherwise indicated)  

NOTE 1 – GENERAL INFORMATION  

Nature of operations  

5N Plus Inc. (“5N Plus” or the “Company”) is a Canadian-based international company. 5N Plus is a producer of specialty metal and chemical products. Fully integrated with closed-loop recycling facilities, the Company’s head office is located at 4385 Garand Street, Saint-Laurent, Quebec (Canada) H4R 2B4. The Company operates manufacturing facilities and sales offices in several locations in Europe, the Americas and Asia. The Company’s shares are listed on the Toronto Stock Exchange (“TSX”). 5N Plus and its subsidiaries represent the “Company” mentioned throughout these unaudited interim condensed consolidated financial statements. The Company has two reportable business segments, namely Electronic Materials and Eco-Friendly Materials.  

The Electronic Materials segment operates in North America, Europe and Asia. Its main products are associated with the following metals: cadmium, gallium, germanium, indium and tellurium. These metals are sold as elements, alloys, chemicals and compounds.  

The Eco-Friendly Materials segment operates in Europe and China. It manufactures and sells refined bismuth and bismuth chemicals, low melting-point alloys, as well as refined selenium and selenium chemicals.  

The Company’s operations are not subject to seasonal fluctuations.  

These unaudited interim condensed consolidated financial statements were authorized for issuance by the Company’s Board of Directors on November 4, 2014.  

NOTE 2 – BASIS OF PRESENTATION  

These unaudited interim condensed consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and as applicable to the preparation of interim financial statements, including International Accounting Standard (“IAS”) 34, “Interim Financial Reporting”. These interim condensed consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2013, which have been prepared in accordance with IFRS as issued by the IASB.  

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company’s accounting policies.  

The functional and presentation currency of the Company is the United States dollar.  

Income taxes  

Taxes on income in interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.
NOTE 3 – ACCOUNTING POLICIES

The accounting policies followed in these unaudited interim condensed consolidated financial statements are consistent with those used to prepare the annual consolidated financial statements for the year ended December 31, 2013, except as described below.

Embedded derivatives

Embedded derivatives, which include debenture conversion option, are recorded at fair value separately from the host contract when their economic characteristics and risks are not clearly and closely related to those of the host contract. Subsequent changes in fair value are recorded in financial expenses in the consolidated statements of earnings.

Changes in accounting policies

The Company has adopted the following new and revised standards, along with any consequential amendments, effective January 1, 2014. These changes were made in accordance with the applicable transitional provisions.

International Financial Reporting Interpretations Committee Interpretation 21, “Levies”, provides guidance on accounting for levies in accordance with the requirements of IAS 37, “Provisions, Contingent Liabilities and Contingent Assets”. The interpretation defines a levy as an outflow from an entity imposed by a government in accordance with legislation and confirms that a liability for a levy is recognized only when the triggering event specified in the legislation occurs. The Company has applied IFRIC 21 on a retrospective basis in compliance with the transitional requirements of IFRIC 21. The application of IFRIC 21 did not result in any significant changes to the interim financial statements.

Future accounting standards change

The following standards have been issued but are not yet effective:

In May 2014, the IASB issued IFRS 15, “Revenues from Contracts with Customers”, to specify how and when to recognize revenue as well as requiring the provision of more information and relevant disclosure. IFRS 15 supersedes IAS 18, “Revenue”, IAS 11, “Construction Contracts”, and other revenue-related interpretations. The standard will be effective on January 1, 2017 for the Company with earlier adoption permitted. The Company is currently evaluating the impact of this standard on its consolidated financial statements.

In July 2014, the IASB amended IFRS 9, “Financial Instruments”, to bring together the classification and measurement, impairment and hedge accounting phases of the IASB’s project to replace IAS 39, “Financial Instruments: Recognition and Measurement”. The standard supersedes all previous versions of IFRS 9 and will be effective on January 1, 2018 for the Company with earlier application permitted. The Company is currently evaluating the impact of this standard on its consolidated financial statements.
NOTE 4 – BUSINESS ACQUISITIONS

Acquisition of 33.33% interest in a subsidiary

On April 3, 2014, the Company acquired for an amount of $2,975 the remaining 33.33% ownership interest in its subsidiary, Sylarus Technologies LLC, a germanium substrate supplier, and changed its name to 5N Plus Semiconductors LLC. As a result, Sylarus became a wholly owned subsidiary of the Company. The consideration paid with the related transaction costs have been recorded in equity.

Acquisition of AM&M Advanced Machine and Materials Inc.

On May 5, 2014, the Company acquired all of the issued and outstanding shares in the capital of AM&M Advanced Machine and Materials Inc. (“AM&M”) for a total consideration of $2,290 (CA$2,517), mostly representing an intangible asset. AM&M is a Kanata, Ontario based corporation specialized in manufacturing micron-sized metallic powders which can be used in a variety of electronic markets, including solder powders, silver-based powders and CIGS powders. The total consideration includes amounts outstanding to be paid up to May 2015 and a contingent consideration.

NOTE 5 – INVENTORIES

<table>
<thead>
<tr>

<td>129,018</td>
</tr>
<tr>
<td><strong>Total inventories</strong></td>
<td><strong>205,665</strong></td>
<td><strong>174,374</strong></td>
</tr>
</tbody>
</table>

For the three-month and nine-month periods ended September 30, 2014, a total of $85,968 and $293,872 of inventories was included as an expense in cost of sales ($90,927 and $271,865 for the three-month and nine-month periods ended September 30, 2013).

For the three-month and nine-month periods ended September 30, 2014, a total of $1,825 and $4,524 of inventories previously written down was recognized as a reduction of expenses in cost of sales ($9,312 and $22,260 for the three-month and nine-month periods ended September 30, 2013).

The majority of inventories are pledged as security for the senior secured revolving facility (Note 6).
NOTE 6 – LONG-TERM DEBT

(1) In August 2014, the Company signed a senior secured multi-currency revolving credit facility of $125,000 maturing in August 2018 to replace its existing $100,000 senior secured revolving facility maturing in August 2015. At any time, the Company has the option to request that the credit facility be expanded to $150,000 through the exercise of an additional $25,000 accordion feature, subject to review and approval by the lenders. This revolving credit facility can be drawn in US dollars, Canadian dollars or Hong Kong dollars drawings bear interest at either the Canadian prime rate, US base rate, Hong Kong base rate or LIBOR, plus a margin based on the Company’s senior consolidated debt to EBITDA ratio. The facility is subject to covenants. As at September 30, 2014, the Company met all covenants.

In addition, in August 2014, the Company’s subsidiary in Belgium entered into a bi-lateral credit facility of 5,000 Euros which is coterminous with the new senior secured multi-currency revolving credit facility, and guaranteed by the same security pool. This bi-lateral facility can be drawn in Euros or US dollars and bears interest at similar rates as the revolving credit facility. No amount was drawn as at September 30, 2014.

(2) The term loan is classified as short-term debt since these amounts could become payable on demand.

NOTE 7 – CONVERTIBLE DEBENTURES

In June 2014, the Company issued convertible unsecured subordinated debentures for CA$60,000 (US$55,266) and an additional over-allotment option for CA$6,000 (US$5,580) for a total of CA$66,000 (US$60,846). The convertible unsecured subordinated debentures bear interest at a rate of 5.75% per annum, payable semi-annually on June 30 and December 31, commencing on December 31, 2014. The convertible debentures are convertible at the holder’s option into the Company’s common shares at a conversion price of CA$6.75 per share, representing a conversion rate of 148.1 common shares per CA$1,000 principal amount of convertible debentures. The convertible debentures will mature on June 30, 2019 and may be redeemed by the Company, in certain circumstances, after June 30, 2017.

The debenture conversion option was recorded as a derivative liability (Note 8). In accordance with IFRS, an obligation to issue shares for a price that is not fixed in the Company’s functional currency must be classified as a derivative liability and measured at fair value, with changes recognized in change in fair value of debenture conversion option in the consolidated statements of earnings.

The fair value of the debenture conversion option, which consists of the holder’s conversion option subject to the Company’s early redemption options, was estimated based on a methodology for pricing convertible bonds using partial differential equations (“PDE”), with the following assumptions: risk-free interest rate of 2.00%; average expected volatility of 40%; expected dividend per share of nil; entity-specific credit spread, and expected life of five years. As a result, the initial fair value of the liability representing the debenture conversion option for the two tranches of the issuance of the debenture was estimated at CA$10,484 (US$9,666). Assumptions were reviewed in the valuation as at September 30, 2014, and remained the same.
NOTE 8 – CATEGORIES OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

Fair value

All financial assets classified as loans and receivables, as well as financial liabilities classified as other liabilities are initially measured at their fair values and subsequently at their amortized cost using the effective interest method. All financial assets and financial liabilities classified as held for trading are measured at their fair values. Gains and losses related to periodic revaluations are recorded in net earnings.

The Company has determined that the carrying value of its short-term financial assets and financial liabilities, including cash and cash equivalents, temporary investments (restricted), accounts receivable, bank indebtedness, and trade and accrued liabilities approximates their fair value due to the short-term maturities of these instruments.

As at September 30, 2014, the fair value of long-term debt approximates its carrying value and is calculated using the present value of future cash flows at the period-end rate for similar debt with the same terms and maturities. The fair value of the convertible debenture including the debenture conversion option, as quoted on the market, is CA$63,030 (US$56,482).

The following table presents financial assets and financial liabilities measured at fair value in the interim consolidated statements of financial position in accordance with the fair value hierarchy. This hierarchy groups financial assets and financial liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and financial liabilities. The fair value hierarchy has the following levels:

- Level 1: unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level in which the financial asset or financial liability is classified is determined based on the lowest level of significant input to the fair value measurement. The financial assets and financial liabilities measured at fair value in the interim consolidated statements of financial position are grouped into the fair value hierarchy as follows:

<table>
<thead>

</tbody>
</table>
Derivative assets and liabilities

The Company has derivative financial instruments which relate to the following:

- Interest rate swap to fix the interest rate on part of its revolving credit facility;
- Foreign exchange forward contracts to sell US dollars in exchange for Euros or Canadian dollars; and to sell Euros in exchange for US dollars, related to hedge strategies;
- Derivative forward contracts to sell and buy precious metals at a fixed price;
- Debenture conversion option; and
- Warrants.

The derivative financial instruments are measured at fair value as follows:

<table>
<thead>
<tr>
<th>Assets (liabilities)</th>
<th>September 30, 2014</th>
<th>December 31, 2013</th>
</tr>
</thead>
<tbody>

<td><strong>(3,284)</strong></td>
<td><strong>(3,282)</strong></td>
</tr>
</tbody>
</table>

(1) This instrument is classified as a Level 3 financial instrument, since the implied volatility is an unobservable input. The change in fair value of debenture conversion option of $5,623 and of $5,811 were recognized in the consolidated statement of earnings for the three-month and nine-month periods ended September 30, 2014 respectively. An increase (decrease) of 5% in the volatility would have increased (decreased) the fair value of the debenture conversion option, as at September 30, 2014, by $1,045.

(2) The interest rate swap has a nominal value of $100,000 commencing in January 2013 and ending in August 2015. Under this swap, the Company will pay a fixed interest rate of 1.82%. The Company received $1,700 when entering into this forward starting interest rate swap in September 2011. This amount forms part of the fair value that is recorded as a long-term liability. The Company initially designated this contract as a cash flow hedge of anticipated variable payments of interest on a nominal amount of $100,000 of the revolving line of credit, and the change in its fair value was recorded in the consolidated statements of comprehensive income. On September 4, 2012, the Company repaid part of its credit facility and de-designated $30,000 of nominal value of the swap. In August 2014, following the refinancing of its credit facility (Note 6), the Company terminated the interest rate swap.

(3) In February 2014, the Company entered into two derivative forward contracts to sell silver at a fixed price to cover purchases of materials containing the precious metal. The first contract fixed the price at $21.83 per ounce as at August 5, 2014 and its nominal value was approximately $1,900. The second contract fixes the price at $20.86 per ounce as at February 3, 2015 and its nominal value is approximately $2,200. Gains or losses on these derivative forward contracts are recorded as part of the cost of sales. In May 2014, the Company entered into two new derivative forward contracts in opposite position in order to crystallize its gain and to neutralize the impacts in the consolidated statements of earnings. As at September 30, 2014, the first contract and the contract in the opposite position matured.
The following methods were used to estimate fair value:

- Interest rate swap: Estimated by discounting expected future cash flows using period-end interest rate yield curves;
- Foreign exchange forward contracts: Estimated by discounting expected future cash flows using period-end currency rate;
- Derivative forward contracts: Estimated by discounting expected future cash flows using period-end market price of the precious metal (silver);
- Debenture conversion option: Refer to Note 7 for details of valuation models; and
- Warrants: Fair value based on the TSX closing price. The ticker symbol of the publicly traded warrants is VNP.WT.

</tbody>
</table>

For the three-month and nine-month periods ended September 30, 2014, a total number of 1,045,010 stock options were excluded from the diluted weighted average number of shares due to their anti-dilutive effect because of the Company’s stock price. The same applies to the warrants which expired on June 6, 2014.

For the three-month and nine-month periods ended September 30, 2013, most of the stock options and warrants were excluded from the diluted weighted average number of shares due to their anti-dilutive effect because of the Company’s stock price.

NOTE 12 – COMMITMENT AND CONTINGENCIES

Commitment

In September 2014, the Company signed a loan agreement with one of its suppliers for the construction of manufacturing equipment in Asia. The loan bears an interest rate of 8.5%, and is guaranteed by the supplier’s corporate entity. Under this agreement, the total amount can reach up to $7,000 upon achievement of certain milestones. The initial tranche was disbursed on October 15, 2014, for an amount of $1,000. Each tranche is to be reimbursed on a monthly basis over a term of 12 months starting after each drawdown.
Contingencies

In the normal course of operations, the Company is exposed to events that could give rise to contingent liabilities or assets. As at the date of issue of the unaudited interim condensed consolidated financial statements, the Company was not aware of any significant events that would have a material effect on its interim condensed consolidated financial statements, except for the following.

As described in the annual consolidated financial statements for the year ended December 31, 2013, the Company settled its case in 2013 with the former shareholders of MCP, thereby prohibiting further related action by either party involved in the settlement. As of the date hereof, the Company does not believe that it is probable that an outflow of resources, which could be material to the financial statements, will be required by the Company following potential third party claims pertaining to actions or events related to the alleged breaches of representations and warranties by the Vendors.

NOTE 13 – FINANCIAL RISK MANAGEMENT

In the normal course of operations, the Company is exposed to various financial risks. These risks include market risk (currency risk, interest rate risk and other price risk), credit risk and liquidity risk. For the nine-month period ended September 30, 2014, the Company was not exposed to new market risks.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company manages liquidity risk through the management of its capital structure. It also manages liquidity risk by continually monitoring actual and projected cash flows, taking into account the Company’s sales and receipts and matching the maturity profile of financial assets and financial liabilities. The Board of Directors reviews and approves the Company’s annual operating and capital budgets, as well as any material transactions out of the ordinary course of business, including proposals on acquisitions and other major investments.

The following table reflects the contractual maturity of the Company’s financial liabilities (including interest) as at September 30, 2014:
