5N Plus sells selenium to manufacturers of zinc selenide (ZnSe). This compound is transparent under infrared light and is used to manufacture lenses for carbon dioxide (CO₂) lasers.

Selenium is also used in glass production, in metallurgy, and as an active ingredient in some novel thin-film solar cell technologies.

**FORM**
- Cored Wire
- Pellet
- Shot

**ALSO AVAILABLE**
- Chemicals

**PURITY**
- 2N5 - 5N
- Crude

**Main Markets**
- Animal feedstock
- Electronics
- Glass
- Optics

**Typical Applications**
- Lenses for carbon dioxide (CO₂) lasers
- Photovoltaic solar industry
- Thermoelectric devices
