

AZUR SPACE

A 5N PLUS COMPANY

Project Manager (m/w/d)

Your responsibilities

- You take ownership of high-impact projects, bring people together, navigate challenges, and turn ambitious ideas into reality.
- Working closely with engineering, operations, manufacturing, quality, supply chain, customers, and leadership, you drive projects from concept to completion.
- Bringing structure to complex initiatives, keeping teams aligned, and identifying risks before they become problems are central to your role.
- You are responsible for ensuring everyone is moving toward the same goal and timeline.
- Your contribution helps drastically increase our capabilities and production capacity.
- As a key member and leader of our team, you take on real ownership and responsibility, with a real opportunity to shape how we grow.

Benefits

- Flexible working hours and defined mobile working options.
- Structured career and development paths, from technical expert to leadership roles.
- Above-average benefits: an attractive company pension scheme, supplementary sick pay once statutory employer-paid sick leave ends, and a monthly non-cash benefit worth €50 net.
- A company-specific collective agreement with IG Metall, providing a reliable framework for pay and working hours.
- Workplace health and wellbeing support, including external counselling services such as doQtor.
- Subsidized bike leasing, optional employee car leasing at your own expense, and employee discounts through Corporate Benefits.
- Modern, well-equipped workplaces in green surroundings, within walking distance of Heilbronn city centre.
- Comfortable break areas with complimentary drinks and access to a shared canteen offering high-quality, varied meals.

Your profile

- You hold a bachelor's degree in Engineering, Science, Business, Project Management, or a related field.
- You bring 5+ years of project management experience, ideally in semiconductor, electronics, advanced manufacturing, or another highly technical environment.
- Your experience includes complex, cross-functional projects, multiple stakeholders, and close collaboration with engineering and technical teams.
- You manage competing priorities, timelines, and dependencies confidently.
- Your expertise covers project, risk, resource, and change management, including relevant tools and methodologies.
- PMP, CAPM, or another project management certification is an asset.
- You combine strong project management fundamentals with a hands-on, entrepreneurial mindset and make things happen.
- You live near Heilbronn or are willing to relocate.

Bring your ideas, drive, and expertise to AZUR SPACE. Apply now and help turn ambitious plans into reality.
