Montreal, Québec, November 3, 2025 – 5N Plus Inc. (TSX: VNP) ("5N+" or "the Company"), a leading global producer of specialty semiconductors and performance materials, today announced its financial results for the three-month period ended September 30, 2025 ("Q3 2025"). All amounts in this press release are expressed in U.S. dollars unless otherwise stated.

"This quarter marks another financial milestone for 5N+, with our strongest quarterly revenue in a decade, record Adjusted gross margin and quarterly Adjusted EBITDA. "The increase in revenue, earnings and margins this quarter reflects the strong momentum and acceleration in demand we have experienced since the beginning of the year from the terrestrial renewable energy and space solar power sectors, as well as strong pricing for bismuth-based products. This outperformance has resulted in a further increase to our Adjusted EBITDA guidance for 2025, positioning us for a truly exceptional year from an earnings generation perspective," said Richard Perron, President and Chief Financial Officer of 5N+.

#### **Financial Highlights**

- Revenue in Q3 2025 increased by 33% to \$104.9 million, compared to \$78.8 million in Q3 2024. The increase is
  primarily attributable to higher sales in the terrestrial renewable energy and space solar power sectors under
  Specialty Semiconductors, and higher bismuth-based product pricing under Performance Materials.
- Adjusted EBITDA in Q3 2025 increased by 86% to \$29.1 million, compared to \$15.6 million in Q3 2024, driven by higher volumes in the terrestrial renewable energy and space solar power sectors, and better prices over inflation for both space solar power and bismuth-based products.
- Adjusted gross margin increased by 58% to \$38.7 million in Q3 2025, favourably impacted by the same factors as above. Adjusted gross margin as a percentage of sales was 36.9% in Q3 2025, compared to 31.1% in Q3 2024.

#### **CEO Succession Plan**

On October 29,2025, the Company announced its CEO succession plan, with the appointment of Richard Perron as President, effective November 1, 2025, in addition to his role of CFO. Gervais Jacques will remain CEO until Mr. Perron assumes the role of President and CEO, effective May 31, 2026, at which time Mr. Jacques will become Executive Chairman of the Board.

### **Outlook**

For the remainder of 2025, 5N+ anticipates demand under Specialty Semiconductors from the terrestrial renewable energy and space solar power markets to remain strong, as customers continue to secure advanced materials from trusted and reliable partners. Under Performance Materials, consistent with historical trends, volumes through the end of 2025 are expected to be slightly lower than compared to the first half of 2025, with margins continuing to benefit from the Company's strategic global footprint and sourcing capabilities in the current volatile business environment.

Based on its financial performance in the first three quarters of the year, coupled with anticipated seasonality impact and other operational factors, Adjusted EBITDA guidance for 2025 has been revised upwards from a range of \$65 to \$70 million, last updated on August 4, 2025, to a range of \$85 to \$90 million.

Looking ahead, the Company will continue to remain prudent in an evolving geopolitical environment, including with regards to its impact on operating costs. As a preferred supplier of ultra-high-purity, high-quality products with a strong supply chain providing customers with a key strategic advantage, 5N+ is well-positioned to continue solidifying its leadership in key end markets through the end of 2025 and going into 2026.

#### **Non-IFRS Measures**

Backlog represents the expected orders the Company has received, but has not yet executed, and that are expected to translate into sales within the next twelve months, expressed in dollars and estimated in number of days not to exceed 365 days. Bookings represent orders received during the period considered, expressed in number of days, and calculated by adding revenue to the increase or decrease in backlog for the period considered, divided by annualized year revenue. 5N+ uses backlog to provide an indication of expected future revenue in days, and bookings to determine its ability to sustain and increase its revenue.

EBITDA means net earnings (loss) before interest expenses, income tax expense (recovery), depreciation and amortization. 5N+ uses EBITDA because it believes it is a meaningful measure of the operating performance of its ongoing business, without the effects of certain expenses. The definition of this non-IFRS measure used by the Company may differ from that used by other companies.

EBITDA is reconciled to the most comparable IFRS measure:

Adjusted gross margin is a measure used to monitor the sales contribution after paying cost of sales, excluding depreciation and inventory impairment charges. 5N+ also expressed this measure in percentage of revenue by dividing the adjusted gross margin value by the total revenue.

Adjusted gross margin is reconciled to the most comparable IFRS measure:

Net debt is calculated as total debt less cash. Any introduced IFRS 16 reporting measures in reference to lease liabilities are excluded from the calculation. 5N+ uses this measure as an indicator of its overall financial position.

The net debt to EBITDA ratio is defined as net debt divided by the trailing 12 months EBITDA.

Total debt and Net debt are reconciled to the most comparable IFRS measure:
